

Rotary Cutting H and Hr Half Trapezoids for O Beautiful! Using a Paper Guide Taped to a Ruler

Print this file at 100% size. Cut out this guide on the solid lines. Tape it to a rotary cutting ruler with the angled edge of the paper guide even with the ruler's edge. Cut a pair of fabric rectangles $2\frac{5}{8}'' \times 7\frac{5}{8}''$ from folded fabric. Align the remaining 3 sides of the guide with one end of the two stacked rectangles. Cut along the ruler to complete 1 H and 1 Hr patch. Rotate the remainder of the rectangle stack and repeat at the opposite end of the rectangle stack, leaving just a sliver of fabric between the 2 cuts. This completes a 2nd H-Hr pair. Trim the point as shown on the guide, using the C trim of my Point Trimmer or ABC Point Trimmer.

Cut H and Hr from the light background fabric. The gray here is for contrast.
