

Rotary Cutting L Prisms & M Half Prisms for O Beautiful!

Using a Paper Guide Taped to a Ruler

Print this file at 100% size. Cut out this guide on the solid lines (both black and red). Tape it to a rotary cutting ruler with the angled edges of the paper guide even with the ruler's corner, as shown within the guide. Cut a fabric rectangle $6\frac{1}{2}'' \times 27\frac{1}{2}''$. To use the guide, align the right and left sides of the paper guide with the long sides of the rectangle. Also align the blunted tip of the guide with one short end of the rectangle. Cut along the ruler's edges at its top and right sides to cut off 2 triangles to complete an M patch. For the L patch, repeat at the opposite end of the rectangle.

Cut L and M from the light background fabric. The gray here is for contrast.
